Surgery and Dental Consent Form

Your pet is here today for a procedure requiring anesthesia. Before administering the anesthetic, we will perform a complete physical examination of your pet. To help us ensure your pet is a low risk patient, we require a Pre-Anesthetic Blood profile to help identify pre-existing problems, which may not be evident during the physical exam. Our blood work profile includes:

- ◆ BUN (Kidney)
- ◆ Creatinine (Kidney)
- ◆ ALKP (Liver)
- ◆ ALT (Liver)
- ◆ Total Protein (Hydration)
- ◆ Glucose (Sugar)
- ◆ CBC (Red and White Blood Cells)

Pain Medications

Pain medications are administered to all surgical patients. The cost of pain medications for elective procedures will vary from \$17.00 - \$44.00, in addition to the surgical fee, depending on the size of the patient and the medications used.

Dental Procedures

Occasionally oral surgery is necessary due to advanced periodontal disease or severe damage to a tooth as a result of trauma or cavities. An additional fee would be incurred for these procedures. If you would like to be called to discuss any necessary extractions or repairs, please let us know now, and leave us a number where you can be reached.

We will contact you before we proceed with oral surgery. Please the best number to contact you at. *Phone # _____

If you cannot be reached: (please check one)

- Please proceed with any treatment needed, including oral surgery or extractions
 Do not perform any additional procedures. I understand that my pet may need to be re-anesthetized at my expense in order to perform the additional procedures

Elizabethan Collar

Some pets require wearing an Elizabethan Collar (E-collar) after surgery to prevent them from chewing or excessively licking at their surgical incision. Cost for an E-collar range between \$13.22 - \$24.04

Do you feel an E-collar would benefit your pet for this procedure? Yes No

Permanent Identification

We can implant a microchip into your pet for an ID that can't get lost! The microchip is detected by a scanner, which identifies a unique personal number that can be traced back to you or our clinic. This simple procedure can be performed today, while your pet is here and under anesthesia. The cost for this procedure is \$55.16

Does your pet have a microchip? Yes No
Would you like a microchip implanted today? Yes No

Spay or Neuter Tattoo

We can place a small tattoo on the abdomen of your pet to show proof that they are spayed or neutered.

Would you like us to perform this service? Yes No

Flea Free Environment

We have a flea free environment. If your pet comes in with fleas, they will be treated with flea preventative at your expense.

I hereby certify that I have read and fully understand this authorization for treatment. I am the owner or agent for the above-described animal and have the authority to execute this consent. I assume financial responsibility for all charges incurred to the above patient and agree to pay all such charges when the animal is released from the hospital. I understand that in the event of an emergency my pet will have treatment provided at my cost and I will be contacted as soon as possible. I understand that any procedure, especially anesthesia, involves some risks and that results cannot be guaranteed.
